

KANBAN SYSTEM AUDIT REPORT

VyuApp Multi-Agent System

Date	09 July 2026
Status	COMPLETED
VPS Incident	RAM Exhaustion (12 concurrent workers)
Root Cause	No concurrency limits configured
Fix Applied	max_in_progress_per_profile=2, max_in_progress_total=4

DAFTAR ISI

1. Ringkasan Eksekutif
2. Kronologi Insiden
3. Temuan Audit
4. Konfigurasi Sebelum & Sesudah
5. Agent Profiles & Kanban Protocol
6. Wrapper Scripts Analysis
7. Rekomendasi
8. Lampiran: Config Changes

1. RINGKASAN EKSEKUTIF

Pada tanggal 9 Juli 2026, VPS mengalami crash akibat kehabisan memori (RAM) saat dispatcher kanban menjalankan 12 task secara bersamaan. Insiden ini mengungkap adanya kekurangan pada konfigurasi batasan konkurensi (concurrency limits) di sistem kanban Hermes Agent.

METRIK	NILAI	STATUS
Total Tasks Created	12	OK
Tasks Completed Before Crash	3	OK
Tasks Blocked (Crash)	9	BLOCKED
Concurrent Workers Spawned	12	EXCEEDED LIMIT
Max Config (Before)	null (unlimited)	CRITICAL
Max Config (After)	per_profile=2, total=4	FIXED

2. KRONOLOGI INSIDEN

WAKTU	EVENT	DETAIL
01:19	Session Start	Hikari memulai sesi, load context dari Redis
01:20	Task Creation	12 kanban tasks dibuat di board vyuapp-e2e
01:21	Dispatcher Run	hermes kanban dispatch menjalankan semua task
01:21	Workers Spawned	12 workers dimulai secara bersamaan
01:22	RAM Exhaustion	VPS kehabisan memori, semua process terminated
01:23	Crash Recovery	Gateway restart, tasks status = blocked

3. TEMUAN AUDIT

ID	SEVERITY	TEMUAN	LOKASI	STATUS
F-001	CRITICAL	max_in_progress_per_profile = null (unlimited)	config.yaml	FIXED
F-002	CRITICAL	max_in_progress_total tidak diset	config.yaml	FIXED
F-003	HIGH	max_concurrent_sessions = null	config.yaml	REVIEW
F-004	MEDIUM	Agent SOUL.md kanban protocol belum lengkap	kanbanfiles/*/SOUL.md	REVIEW
F-005	LOW	Wrapper scripts tidak ada rate limiting	scripts/kanban-*.sh	OK

4. KONFIGURASI SEBELUM & SESUDAH

SETTING	VALUE (BEFORE)	VALUE (AFTER)
dispatch_in_gateway	true	true
dispatch_interval_seconds	60	60
failure_limit	2	2
max_in_progress_per_profile	null	2
max_in_progress_total	(not set)	4
auto_decompose	true	true
auto_decompose_per_tick	3	3
dispatch_stale_timeout_seconds	14400	14400

5. AGENT PROFILES & KANBAN PROTOCOL

AGENT	PROFILE	KANBAN PROTOCOL	WRAPPER SCRIPT	STATUS
Scheherazade	backend-dev	YES	kanban-backend-dev-wrapper.sh	READY
Tamamo	frontend-dev	YES	kanban-frontend-dev-wrapper.sh	READY
Mordred	dev	YES	kanban-dev-wrapper.sh	READY
Scathach	qa-code	YES	kanban-qa-code-wrapper.sh	READY
Circe	devops	YES	kanban-devops-wrapper.sh	READY
Nero	ui-ux	YES	kanban-ui-ux-wrapper.sh	READY
Jeanne	qa	YES	kanban-qa-wrapper.sh	READY
Helena	scout	YES	kanban-scout-wrapper.sh	READY
Artoria	scribe	YES	kanban-scribe-wrapper.sh	READY
Artoria	project-manager	YES	kanban-project-manager-wrapper.sh	READY

6. WRAPPER SCRIPTS ANALYSIS

Setiap agent memiliki wrapper script yang melakukan: 1. Publish event "start" ke StreamBus 2. Menjalankan hermes -p chat -q "work kanban task \$TASK_ID" 3. Auto-complete task saat selesai 4. Publish event "complete" atau "failed" ke StreamBus Wrapper scripts sudah benar dan tidak memerlukan perubahan.

7. REKOMENDASI

PRIORITY	REKOMENDASI	STATUS
P1	Set max_in_progress_per_profile = 2	DONE
P1	Set max_in_progress_total = 4	DONE
P2	Monitor RAM usage saat dispatcher running	PENDING
P2	Test dispatch dengan 4 tasks concurrent	PENDING
P3	Review max_concurrent_sessions setting	PENDING
P3	Add RAM monitoring alert	PENDING
